Norrn Alpha Correlation vs SBX Index

Fund Manager's comment (Norrn Active)

After two strong months, the stock market in Sweden was down half a percent. The other Nordic countries were mixed, with Norway up 3,5 percent (oil price + 5,1 percent) and Denmark down 4,2 percent (Danske bank AML). MSCI Nordic was down 0,4 percent. The CSX Sweden (small cap) was down 1 percent and the large cap index OMX was up 0,3 percent. The macro data in September still indicate strong global growth but trade war between China and US escalated in September and brought continued uncertainty about how it will affect global growth. Norron Active was up 1,71 percent and the SBX index was down 0,5 percent. The main positive contributors were Hansa Medical, BioArctic, Aker ASA, Atlantic Sapphire and Swedbank, and the main negative contributors were Danske bank, Kindred Group, Kinnevik, Essity and Nordic Semiconductor.
